

SR. No.	Registration No.	Name	TA Topic	SE II Lab Topic	Comments	
					Q1 Comments	Q2 Comments
1	171071038	SAYALI MARUTI WAGH	Exam Cell Automation System	Student Record Management System	Attributes for student class - email, examination, semester required , result class - marks, semester required and methods for generating hall ticket required, make methods public (if they are private they can't be accessed), login, logout methods required for class Admin	Usecase relationships (includes, extends) not mentioned, Add result, generate hall ticket, download hall ticket usecases required, Interaction diagram not proper - admin will add subject, faculty, semester result etc. The interaction diagram is to be drawn w.r.t. use case and not w.r.t. actors eg. Update profile or generate hall ticket.
2	181070001	AGRAWAL YASH SATISH	Internet Based Discussion Forum	HR Management System	Class diagram not proper, relationship between classes not specified, Admin, student, alumni, teacher classes required, also use generalized user class for login (control layer, view layer classes not required)	Employee performance and job recruitment usecases not mentioned, interaction diagram - message sequence not proper (don't draw messages between different objects on same line, they have a sequence)
3	181070002	AJINKYA ANANT HAZARE	Dental Caries Detection System	Petroleum Distribution Network	Access modifiers are not proper (use private for attributes and public for methods that are accessed by other classes else private for other methods), attribute datatype not specified	Interaction Diagram not proper - add payment successful/unsuccessful, also accountant will update database
4	181070003	AKSHAT NITIN SAVLA	Public Photography contest with Live Voting	Student Housing System	attribute datatype not specified in class diagram, add attributes for voter and participant classes	Use case diagram- shift to empty room and swap room will have includes relationship, more non-functional requirements can be added
5	181070004	AMBEKAR ADITYA KISHOR	Smart Cab System Using Barcode Scan	Crowdsourcing Analysis Platform	Association between travel card and user is not mentioned in class diagram	answering questionnaire state of State transition diagram missing

					(1 to 1 relationship)	
6	181070005	AMOGH KARANKAL	Clinic Management System	Event Organization System	Generate bill and issue token number methods should be included in Receptionist Class, Access modifiers are not proper (use private for attributes and public for methods that are accessed by other classes)	explain functional requirements w.r.t. functions of the system, state transition diagram - symbols not proper (decision node not used in state transition diagram)
7	181070006	anantim patil	Online Printed T-Shirt Designing System	Railway Reservation Portal	Admin Login, User Login, Registration methods not used, also better to make abstract class for users, add design class for customizing tshirt	explain functional requirements in details, in booking ticket state transition diagram do not add ticket cancellation states
8	181070007	WASNIK ANKUR DASHRATH	Career Guidance Project	Reserve Bank of India	for Test class questions attribute, answer, submit test methods, admin login method are required, access modifiers are not mentioned	Q2 is attempted on TA Topic instead of SE Lab topic
9	181070008	BAN VEDANT BALASAHEB	Android Bluetooth Chat	Mess management system	Create, edit profile, add profile picture methods required, Access modifiers are not proper (use private for attributes and public for methods that are accessed by other classes), class relationship not mentioned, attribute datatype not specified	explain the non functional requirements that are not explained, use case relationship not mentioned, state transition or interaction diagram not attempted Q2 part 4 not attempted
10	181070009	BANDGAR SIDDHESH BALWANT	Image Search Perfection System	Online Examination System	Access modifiers are not proper (use private for attributes and public for methods that are accessed by other classes)	Interaction Diagram - password and username will be emailed to valid system by the system and not admin
11	181070010	BHASHYA SHETH	Graphical Password to Avoid Shoulder surfing	Online Shopping Enterprise	Registration class - password length attribute, Method for selecting colors missing in class diagram, Login class - select color arc, rotate_direction required, attribute datatype not specified	Non-functional requirements not explained, combine usecase diagrams into one, also relationship between usecases not mentioned in combined use case diagram, Q2 part 3 not proper - explain algorithm or expression of an

						important use case, for Q2 part4 it is not clear whether it is state transition diagram or interaction diagram, in state transition diagram there are no decision symbols and in interaction diagram we show messages passed between objects or actors
12	181070012	DABADE KUSH TANAJI	Student Examination DataCard	NGO Management System	Student class - add exams and add results methods required, if student in ssc then issue datacard with result	Combine use case diagrams, interaction diagram - more messages like make donation, select amount, enter aadhar no, pan no, enter payment details (card, net banking, upi), enter otp, payment successful or not etc. are required also include payment gateway as object.
13	181070013	DANDALE HARSHAL ARVIND	Cancer Prediction Using Data Mining	Portfolio management system	Not attempted	explain the non-functional requirements properly, drawn class diagram instead of use case diagram, Q2 part 3 wrongly attempted, Q2 part 4 not attempted
14	181070014	DESAI CHINMAY MAHENDRA	College Admission Predictor application	Online Shopping Portal	list of colleges should be given to the students to choose from, also Student Class - select branch or stream required, College class - cap rounds and list, allotted seats	only 2 non-functional requirements explained, interaction diagram - if you are specifying checkout, you need to give payment messages like enter payment details (card, net banking, upi), enter otp, payment successful or not etc. are required also include payment gateway as object.
15	181070015	DESAI MITESH SANJAY	Detect irregular moving objects and tracking based on	Travel Agency System	Add comments in the code	Q2 is attempted on TA Topic instead of SE Lab topic

			color and shape in real time			
16	181070016	DHALKAR PARIJAT DEVENDRA	Internet Based Live Courier Tracking and Delivery System	Face detection system	Customer will have tracking id, Courier package - status of package, registration	Interaction Diagram order of object placement is wrong - image will be first sent to system then it will check with database
17	181070017	DHOLAKIA SAGAR SUNIL	Human speed Detection	Boat Chartering System	improper use of relationship between classes - relationship between user and system is association and not abstraction	write more functional requirements, only 3 functional requirements explained, in state transition diagram there will be different states of the object and not the object eg. the use case is selecting boat so the states will be specify no. of people, boat color, boat type, select boat, payment, payment successful or not etc.
18	181070018	DOSHI HARSHIL DHARMESH	Collective Face Detection	File Transfer and Chat Management System	add recognition parameters (weights learned) as attributes in recognition class	proper symbols not used for state transition diagrams (decision symbol)
19	181070025	HUSAIN QASIM ALI SAIF	Search Engine using Web Annotation	Movie ticket booking system	Add, modify, remove information methods not included, also admin class not included, datatypes not mentioned	explain functional and non-functional requirements; add some more states in state transition diagram - select movie, select theatre, select time, select date, seats, also for payment - add payment info., input otp etc.
20	181070026	ITANKAR PIYUSH SHARAD	Online Court Room	Income Tax Portal	Add more classes like Judge, Convicts, Lawyers, Court reporter etc. create abstract class of Users for generalization	relationship between usecases not specified (includes and extends), interaction diagram incomplete - enter payment details (card, net banking, upi), enter otp, payment successful or not etc. required
21	181070027	JADHAV ROHIT	The Cibil System	Supermarket	admin class not present, registration,	relationship between the usecases

		RAMESH		management system	login not mentioned, relationship between the classes is not properly specified, access modifiers are not proper (use private for attributes and public for methods that are accessed by other classes)	is not properly specified, functional and non-functional requirements not properly explained, Q2 part 3 wrongly attempted, improper symbols for state transition diagram (decision node not used in state transition diagram)
22	181070028	KALSHETTI ABHISHEK LAXMAN	Fingerprint Based ATM System	Internet Service Provider Administration	relationship between the classes is not properly specified, also specify association, abstraction/generalization, composition in class diagram	only 2 non-functional requirements explained, relationship between the usecases is not properly specified (includes), messages are wrong for payment interaction diagram
23	181070029	KANEGAONKAR SAURAV VIVEK	E commerce for Online Medicine Shopping	Avion Management System	medicine availability attribute required	use case diagram and interaction diagram are drawn congestedly, draw proper message sequence
24	181070030	KAZI SAIF ASIF	Engineering College Automation and Scheduling System	Personal Finance Assistance Application	attribute datatype not specified for class diagram, add department class	more requirements needed, add conditions in alt box of interaction diagram
25	181070031	KUNDURMUTT SAI SADASHIVA JAYDEV	Image Character Recognition	Online Chat Application	class diagram is not properly drawn	Combine use case diagrams, Q2 part 4 not attempted
26	181070034	MANE ABHISHEK MILIND	Online Health Shopping Portal with Product Recommendation	College, School bus Transportation Management system	make user class generalization for login, attributes of cart class are wrong - no need to mention every product, instead just mention product list	Explain requirements in detail, use case diagram is wrong, Q2 part 4 (interaction diagram or state transition diagram is wrongly attempted)
27	181070036	MOHAMMED MEHDI ALIRAZA PATEL	Diabetic Retinopathy Detection from Retinal Images	Restaurant Management System	Class diagram is drawn of Lab topic instead of TA topic	
28	181070037	NAVEEN NEHRU	Quality Checking Using Image	School Management	draw the class diagram with required attributes along with their methods,	explain functional requirements w.r.t. functions, in use case diagram

			Processing	System	convert to grayscale images, train, test methods	add management of other staff by admin
29	181070038	NAYAK SIDDHARTH SATISH	Weather Forecasting	Vehicle Rental Service		state transition diagram should not have decision node
30	181070040	PANCHAL HEMISH JAYESH	Online Mobile Recharge Portal	Salary Management System	add payment class, post-paid recharge class is absent, customer class is absent	relationship between use cases not specified, explain algorithm properly, in interaction diagram the employee will communicate with the system and not admin
31	181070041	PANCHAL YASHWIK RAJESH	Automated Canteen Ordering System	Telephone Billing System	add class canteen_owner with attributes institute_name, institute_id, canteen_id and permission and methods print_receipt(),changes(), select_feeMode(), class canteen_manager with attributes	relationship between usecases not specified
32	181070042	PANDEY SURENDRAKUMAR ANURUDDHAPRASAD	online Pizza ordering System	Online sports tournament Management system		In usecase:admin should verify the matches created, solving query, add usecase 'make entries of tournament','select the selection procedure, e.g. college level<<extends>>all students are allowed','select selection procedure<<extends>>best player selected' ; In State transition only admin states are mentioned.
33	181070043	PANDHARE SANIL SHASHANK	Cloud based Local train Ticket System	Cab/Bus Ticket Booking System	Class diagram: the line, harbour,central and western classes are not associated with any other classes; in class 'ticket' add attributes 'Starting location' and 'Destination location' with method 'PaymentAmount()'	functional requirements not explained properly, In usecase: view ticket after booking, payment receipt after making payment; In state transition payment is not included.
34	181070044	PAREKH ARCHEEL	Online Visiting card	Inventory and	in classdiagram: remove the	in usecase diagram for 'manager'

		PARESH	Creation Project	Sales management system	comments,admin should also manage the customers; in class 'card' add methods 'edit', 'download', 'delete', 'new'	add usecase 'quality control and checking of stocks', add usecase 'supplier' with usecases 'provide stock'
35	181070045	PATKAR ADITYA KRISHNA	AI multi Agent Shopping system	Pharmacy Distribution and Handling System	add details about relationship between the classes	In sequence diagram: payment state is missing
36	181070047	PRASHAM PARAG GALA	Intelligent tourist System	Groceries Distribution and Management	Methods are not present in class diagram and visibility of attributes(public, private or protected) not mentioned	Enhance the use case diagram: add usecases 'storage maintainer' with usecases 'record transactions', 'update inventory information','alert managers', for actor 'delievery partener' add usecase 'view bill' and 'live location'; In transition diagram: add a state to check if product is available or not then accept the order; after processing add payment state if payment not done cancel the order
37	181070048	PRATIK VIJAY BARAI	E Healthcare-Online Consultation And Medical Subscription	Electricity Billing system		explain non-functional requirements, In sequence diagram add objects 'customer', 'reading' , 'consumptions', 'units', 'bills'
38	181070049	PREMSING MALESH RATHOD	Matrimonial Portal	Contact Management System	class diagram is drawn w.r.t lab case study	explain the functional requirements, Add some more non-functional requirements;use case should be in proper manner, state transition diagram is not proper; add more requirements, improper use case diagram - no system box and use cases, actors not in proper order, decision node used in state

						transition diagram
39	181070052	RISHIV ARUN CHHABRIA	Online Law System	Blood Donation System	In class diagram: registration of judges, victims and criminals;manage court sesions; time sessions for cases	before login state add 'registration' state; 'verification' state after registration; 'take blood and update database'
40	181070053	SANKALP VILAS GONGLE	Online Bakery Shop System	Online Medical Store	in class diagram add delievry options;	In state Transition diagram: if payment is not done cancel the order; usecases are placed outside system boundary, state transition diagram is for use case not for actor
41	181070054	SANKHE ADVAIT MAHENDRA	Public News Droid	Parking lot management system		relationship between usecases not proper, Q2 part 4 not attempted
42	181070056	SARNAYAK DHANESH JITENDRA	Enhanced Library Management System	Home Workout System	In class diagram: add ebook class, book return management class	in functional requirements mention actors and their working in system, add inventory of workouts, add payment working, state transition or activity or iteration diagram is not drawn; Q2 part 3 and 4 not attempted
43	181070058	SHAH MOUNIL KAMLESH	Bikers Portal	Placement Management System	In class diagram can add rent class, add more methods in trip history	draw state transition or iteration diagram to know flow of system; add comments to use case diagram
44	181070059	SHAH PARTH RAKESH	Farming stock Trading application	Order Management System	add more methods for 'admin'; update(), permission(), add or remove_user()	wrong symbols are used for usecase, include staff members in usecase, draw diagram to show flow of process
45	181070060	SHENDE ANSHUL TUKARAM	College Selection Application	Library Management System	add submit() method for feedback form class; add visibility of attributes(public, private or protected); add 'result() method in test class	in functional requirements add return book, due dates and due payment;in state transition diagram if anybody is late for returning book make them pay for it.
46	181070061	SHIVAMDHAR	E- Authentication	Social Networking	Add admin class, draw the class	Admin should also manage posts,

		SHESH DHAR DUBEY	System Using QR code and OTP	System	diagram properly; add e_mailId or phone_no, user_id, password in class authentication	user must have unique id and password, user should not be allowed to create multiple accounts
47	181070064	SUNANDAN SHARMA	Online Loan Application and Verification System	Class time table organizer	class diagram is not drawn properly, mention attributes and methods along with association with other classes	explain the non-functional requirements in brief, add comments in usecase diagram; Draw the state transition diagram according to case study add states w.r.t use case diagram.
48	181070065	TAILOR YASH RITESH	Video Surveillance System	Online Voting Management System	add camera 'class' with methods '+pause(video)', '+restart(video)' and '+resume(video)' with attributes '+cam: String'	explain functional requirements; add calculation and result state in state transition diagram
49	181070066	TANMAY SURINDRA BHAT	Online Diagnostic Lab Reporting System	Phonebook Directory Application	add test class to show options for testing, class to check paid fees, lab report classes	explain functional requirements w.r.t. functions of the system, draw syetem box in use case diagram, use proper symbols for state transition diagram
50	181070067	TEJAS JHAMNANI	Education Assignment Dashboard	Hospital Management System	assignment management class; add class 'feedback'	in functional requirements: payment management, doctor's appointment management, patient's intake and discharge management, hospital staff management, hospital staff salary management, if have diagnostic lab management. Draw proper state transition diagram with proper states,Q2 part 3 - algorithm or expression of use case not explained
51	181070070	VAKHARIA PRIYESH RAJESH	Online Herbs Shopping	PG service system	add review, suggestions, orders,mention attributes of fruit and herb classes	explain functional requirements w.r.t. functions of the system
52	181070071	VICHARE ATHARVA AJAY	Cargo Booking Software	Online Survey System	mention the what kind of relationships are there between classes; mention	add some more non-functional requirements; add comments in

					which attributes are public or private	usecase
53	181070072	VORA ROHAN ROHIT	E- Learning System	Online Recharge System	add schedule class with methods: id, name, type and description; add fees class with attributes: id, amount, total_fee, payment, type and description	system box not drawn for use case diagram, messages between the states should be mentioned in state transtion diagram
54	181070073	YADAV VIRAJ MANOJKUMAR	Advanced Reliable Real Estate Portal	Login Registration System		usecase diagram is not proper
55	181070074	YOGESH RAHUL DESHPANDE	Efficient Doctor Patient Portal	College Record System	add association, relations in the class diagram; add class medical report; add class admin to manage the portal	add database object in sequence diagram to access the information
56	181071011	CHAVAN SAKSHI RAJESHSING	Secure online Auction system	Gym Administrative system	add payment management in class diagram, buyers class, auction management	add states in state transition: gym workouts, gym batches
57	181071019	DURGE GARGI MANOJ	Online E-book Maker	Doctor appointment system	haven't drawn class diagram	haven't included functional and non-functional requirements; part 3 also not attempted
58	181071020	GAMBARE SANJYOT RAMESH	Android Patient Tracker	loan management system	add diagnosis class	write functional requirements in detail, explain the non-functional requirements, state transition diagram symbols not proper
59	181071021	GANDHI MONA BHUPENDRA	Railway Tracking and Arrival Time Prediction	Stock Management System		drawn dfd instead of state transition
60	181071022	GAWANDE RASIKA RAMDAS	Advanced Mobile Store Project	Hotel room reservation system	add more methods	
61	181071023	GUPTA RIYA RAKESH	Camera Motion Sensing Project	Hostel management system	add motion inventory , motion detection class, add camera functionalities	
62	181071024	HRIM DEEPAK GANDHI	Military Access Using Card Scanning with OTP	Payroll management system	attributes not proper, attribute datatype not specifieddraw class diagram with proper attributes and	write commands in use case diagram

					methods	
63	181071032	LAD TANAYA JITENDRA	Face Recognition Attendance System	Class Management System	use capture method in camera class to capture the image of student then compare with student's image from database, admin should manage student's attendance	draw any diagram to show flow of system processes
64	181071033	LEKURWALE DISHA RAMESH	Heart Disease Prediction	Foodscape- Food Delivery system		explain more functional requirements;
65	181071035	MANTRY PALAK ANAND	Improved Data Leakage Detection	(Charity)Donation Portal	add trace class to identify who leaked the data into class diagram , add datatypes	add and explain more functional requirements, explain non- functional requirements
66	181071039	NEHA MOHANDAS BHARSAT	Detecting E Banking Phishing Websites Using Associative Classification	Automated Library System	Draw class diagram	state transition diagram symbols not proper, Q2 part 3 not attempted
67	181071046	PAWAR SHIVANI DEVESH	Automated Payroll with GPS Tracking and Image capture	Farmers Inventory Management and Ecommerce	use camera class and then use capture and store method then compare it with images stored in database	explain the algorithm; add more messages in interaction diagram; add payment object in interaction diagram; add stock management object
68	181071050	RAIGADE SAYALI RAJENDRA	Fingerprint Based Voting System	Health Care Portal	add database class to verify the fingerprint from it; add attribute 'photo' in 'voter profile' class and apply '+getVoterphoto()', '+setVoterphoto()' methods	Explain algorithm briefly
69	181071051	RASIKA RAJU CHAVAN	Expression Identification using Image Processing	Holiday Booking System		before 'confirm booking' state add 'get tour details'
70	181071055	SARAKSHI SANJAY PHATE	Sentiment Based Movie Rating System	Car Booking System	user class is missing, add 'movie' class with attributes 'title', 'year' and 'genreset' with methods '+getTitle()', '+setTitle()'	

					'getGenerSet:HashSet<string>', 'setGenerSet:HashSet<String>', '+getYear()', '+setYear()'	
71	181071057	SHAH DEVANSHI NITIN	Crime rate prediction using K means	E-commerce for tribal people		add comments in use case, first add 'e-commerce website' object in sequence diagram instead of 'system' object, then add objects 'customer', 'product' and 'database' respectively. then build the sequence diagram on basis of these objects
72	181071063	SHREYA DHANANJAY	Brain Tumor Detection Using Image Segmentation	Flight Ticket Booking System		In sequence diagram add 'customer database' and 'reservation system' object
73	181071068	THOKAL DEVARSHEE SANJAY	E-Governance Project	Supermarket billing system	Department calss, comment class, Government and sub-classes mentioned in casestudy not present	purchased items reciept in functional requirement, draw any digram to specify flow of system process; usecase diagram is absent
74	181071069	URANKAR KETAKI ANIL	Cloud Based online Blood Bank System	Bank Management System	relationship between classes not specified (abstraction, composition), Blood stock class will have storage area and storage date as attributes	Explain functional and non functional requirements, relationship between usecases not specified, arrowheads are missing in state transition diagram for some messages
75	191070903	PATIL PRATHAMESH PRAMOD	Criminal Investigation Tracker with suspect Prediction	Night Campout	in suspect class add history of suspect, identity proof, nationality; relationship between classes not specified, attribute datatype not mentioned	Explain functional and non functional requirements, relationship between usecases not specified, use activation box in interaction diagram wherever messages are sent or received
76	191070906	BABAR ANIRUDDHA VIJAY	Data Protection Using Hand	Make in India (Mobile App)	Data protection class not included, combine capture class to main	explain more functional requirements, in state transition

			gestures		diagram	diagram needs to be drawn for particular use case and not for actors
77	191070908	RAUT ABHIJEET MAHENDRA	Filtering Political Sentiment in Social Media from Textual Information	All in one billing system	access modifiers not proper (use private for attributes and public for methods that are accessed by other classes else private for other methods)	non-functional requirements not proper, class diagram drawn instead of use case diagram, state transition diagram not proper (decision node is not used in state transition diagram), Q2 part 3 not attempted
78	191071901	NAIK ISHA MILIND	Secure Backup Software System	Snack-bar Management System	access modifiers not proper (use private for attributes and public for methods that are accessed by other classes else private for other methods)	explain non-functional requirements, system box or container for use case diagram, add relationship between use cases (includes, excludes)
79	191071902	SRUSHTI RAJESH SHAH	Diagnostic Center Client Co-ordination System	Job Recruitment System	access modifiers for methods not used, add report class	Q2 is attempted on TA topic not on SE Lab topic
80	191071904	DESHMUKH MANASI PRADIPRAO	Web Page Builder	Movie Ticket Booking system	access modifiers not used, relationship between classes not specified(association, abstraction, composition should be specified as per requirement)	only 3 non functional requirements specified, system box not drawn and no proper relationship between the use cases, symbols not proper in state transition diagram (decision node should not be used in state transition diagram)
81	191071905	BAGUL PRAGATI PRASHANT	Fake product review and removal of fake reviews	CodeBugs	some attributes are public (attributes should be mostly private), review processing class missing	explain functional requirements w.r.t functions of the system, state transition diagram is not proper(decision node not used in state transition diagram), end state is not present
82	191071907	KALE GAURI SURESH	Sports Club Management	Online Book Store	attribute and method datatype not specified, generalization for user class	Q2 is attempted on TA topic not on SE Lab topic

					can be done, relationship between classes not properly specified, access modifiers not proper (use private for attributes and public for methods that are accessed by other classes else private for other methods)	
83	171070001	NITIN SHARMA	Online Travel Agency	Music Library Management System	add proper relationships between the classes (association, abstraction, composition should be specified as per requirement), access modifiers not proper (use private for attributes and public for methods that are accessed by other classes), Permission class in travel agency class diagram is unnecessary	Admin is not present in use case diagram, Q2 part 3 and 4 wrongly attempted (component diagram drawn instead of interaction or state transition)
